MATH 97/91
Elementary Algebra Computer/Tutorial Lab

Description: The Algebra Lab is a credit/no credit, supplemental self-directed internet based class created to enhance student understanding and performance in Math 97.

Supplies: Internet access and an e-mail account are necessary for this course. Computer access is available free of charge in the Campus Computer Lab located in room 839.

The required software program is MyMathLab. It is bundled with the text, Elementary and Intermediate Algebra by Bittinger in the Campus Book Store. It is also available for purchase as a separate item. A course ID number provided by Anne Cook is necessary to access and begin using the software.

Requirements: MyMathLab has 23 sections corresponding to the sections of Chapters 4-6 of the textbook. Each student is required to complete all sections by the end of the semester; 6 sections are due every 4 weeks. Each section needs to have 70% accuracy or better.

Grading: Credit is received by acceptably completing all of the 24 available sections, each with individual scores of 70% or better. Non-compliance results in a grade of “No Credit.” Students may check their own progress using the MyMathLab software.

Orientations: Attend an orientation by the end of the second week of the semester. Anne Cook gives orientations. Her hours will be provided early in the semester. She can also be contacted at acook@napavalley.edu.

Campus Computer Lab Hours: Monday - Thursday 8 am - 7:45 pm
Friday 8 am - 3:45 pm
