MATH 94/95
Elementary Algebra Computer/Tutorial Lab

**Description:** The Algebra Lab is a credit/no credit, supplemental self-directed internet based class created to enhance student understanding and performance in Math 94.

**Supplies:** Internet access and an e-mail account are necessary for this course. Computer access is available free of charge in the Campus Computer Lab located in room 839.

The required software program is MyMathLab. It is bundled with the Bittinger text, *Elementary and Intermediate Algebra* by Bittinger in the Campus Book Store. It can also be purchased as a separate item. **A course ID number provided by Anne Cook is necessary to access and begin using the software.**

**Requirements:** MyMathLab has 37 sections corresponding to the sections of the second half of the textbook. Each student is required to complete 32 sections of their choice by the end of the semester; 8 sections are due every 4 weeks. Each section needs to have 70% accuracy or better.

Some instructors select the online sections they wish their students to complete. If this is the case for you, submit their assignments and whatever other sections are necessary to reach a total of 32.

**Grading:** Credit is received by acceptably completing 32 of the 37 available sections, each with individual scores of 70% or better. Non-compliance results in a grade of “No Credit.” Students may check their own progress using the MyMathLab software.

**Orientations:** Attend an orientation by **the end of the second week of the semester.** Anne Cook gives orientations. Her hours will be provided early in the semester. She can also be contacted at acook@napavalley.edu.

**Campus Computer Lab Hours:** Monday - Thursday 8 am - 7:45 pm
Friday 8 am - 3:45 pm
