#### 1. Standard protocol  

#### 2. Loosen all top linens  
   a. Remove bedspread, leaving client covered with top sheet. 
   b. Fold spread if clean and to be reused. 

#### 3. Assist client to side-lying position on far side of bed  
   a. Slide pillow so it remains under client's head. 
   b. Roll used bottom sheet and absorbent pad toward client. 
   c. Place clean bottom sheet on center of bed. Tuck top under head end of mattress 
   d. Place center of absorbent pad against client and fanfold half of pad closest to client. 

#### 4. Assist client to log-roll over all linens keeping client covered.  
   a. Raise side rail on side client facing. 
   b. Go to other side of bed and lower side rail 
   c. Remove soiled linens. 
   d. Slide clean linen toward you and straighten 
   e. Grasp side of bottom sheet and tuck under mattress proceeding from top to bottom. 
   f. Assist patient to supine position; place a clean top sheet and spread over client leaving several inches of sheet at top and fold over spread. 
   g. Slide out used top sheet. 
   h. Make a modified miter corner with top sheet and blanket at foot of bed. Miter corner, but do not tuck in lower edge of triangle. 
   i. Loosen linen at feet. 
   j. Remove pillow and change pillowcase. 

#### 5. Standard protocol
