Goal: Understand the characteristics, clinical manifestations, treatment, and nursing management of selected infectious and communicable childhood diseases. This seminar will help prepare you for your daycare experience next semester.

Seminar Preparation:
2. Brainstorm with seminar group ways of presenting information.
3. In teams of 3-4 have one student from each clinical group randomly select one of the following topics.
4. Spend the remaining time working in small groups planning the teaching project.

Teach/Learn Guidelines:
Develop a 10 minute teach using handouts, posters, and visual aids – be creative. Presentations should include, but are not limited to, the following key concepts:
- The causative agent
- Any preventive measures
- Clinical manifestations
- Treatment measures
- Prognosis
- Nursing Diagnosis

Due Date: This information will be presented to the entire class. See calendar. FYI – Yes, this content will be on your next exam. So read, listen and pay attention!
