As a result of changing circumstances beginning in FY 2021, the board has taken an adaptive approach in discussing and developing our two-year goals. As in years’ past, the Board will revisit current goals in SU2022, and revise accordingly.

1. Eliminate the enhanced monitoring status recently imposed at NVC by 2023. The Board will provide direction to the superintendent/president in developing sound budgeting and spending practices, completing a successful FCMAT audit/review, and development of an administrative budgeting and planning process that produces on-time and accurate budgeting information.

2. Hire and retain a permanent superintendent/president. The Board’s primary responsibilities include hiring, directing, supporting, and supervising the college president. As a result of an early change in the president’s office, the board has raised this priority to a goal.

3. Complete a successful ACCJC Evaluation in 2022. NVC is on track for a successful evaluation; however, the Board notes that many of the administrative procedures that past administrations were tasked to complete, going as far back as 2010, have not been completed. As a result, the board directs the president’s office, to complete by October 2022, timely approval of the standard and current CCLC (League) procedures, a signed memorandum that commits administration to collegial consultation of all APs, and further development of a comprehensive timetable for consultation/review/updating of APs to address future needs.

4. BOT members will receive training through CCLC conferences, seminars, or workshops, on the development and application of board policy, supervision of BOT employee(s) and other functions of the board.

5. The Board of Trustees commits the district to integrating the values of diversity, equity, inclusion, and accessibility into its policies, procedures and actions.

6. Institutional Technology – The Board requests that the superintendent/president address IT updates and needs and provide a report by June 30, 2022.
