CB08 Basic Skills Status

NBS - Not Basic Skills

CB09 SAM Code

E - Non-Occupational

Rationale

Non-substantive review, update course to course leaf format and added an updated text book.

SECTION B - Course Description

Catalog Course Description

The basic processes and technologies of ceramics and appreciation of clay as a form of artistic expression will be explored. Introduction to a variety of potters' wheel throwing methods and hands-on use of these processes to create various wheel thrown pieces. Includes an introduction to the appreciation of historic ceramic objects. Lectures on clay, glazes, kilns and firing. Appropriate for all art majors and minors as well as general interest students.

SECTION E - Course Content

Student Learning Outcomes

Upon satisfactory completion of the course, students will be able to:	
1.	Create thrown ceramic works that utilize historic and contemporary practices, theories and materials and evaluate these works using proper visual art terminology.
2.	Safely handle and maintain materials, studio facilities, and equipment.

Course Objectives

Upon satisfactory completion of the course, students will be able to:	
1.	Differentiate clay varieties and ceramic process stages.
2.	Create ceramic forms utilizing the potter's wheel and throwing techniques.
3.	Analyze existing ceramic pieces and distinguish the forming processes used in creating them, while connecting these techniques and or styles to ancient ceramics and the various cultures that have produced them.
4.	Produce and apply surface treatment to a variety of different forms.
5.	Analyze existing ceramic pieces and distinguish the processes used to develop their surfaces.
6.	Create objects that demonstrate an ability to translate ideas into tactile forms.

7. Assess and critique ceramic works in group, individual and written contexts using relevant critique formats, concepts and terminology.
8. Operate and maintain studio equipment, facilities and materials.

Course Content

1. Clay and Forming
 - a. The origins of clay as a material and ceramics as a process.
 - b. Major throwing techniques.
 - c. A general historic and contemporary overview of the practical applications of forming methods.
2. Surface Development
 - a. The major surface developments and decoration techniques including texture, slip, glaze and firing atmospheres.
 - b. A general historic and contemporary overview of the practical applications of surface development and decoration.
3. Composition and Discussion
 - a. Three-dimensional compositional techniques and concepts related to form-making and surface development.
 - b. Critique methods and terminology.
4. Studio Equipment
 - a. Operation and maintenance of studio tools, equipment and facilities including The potter's wheel, general hand-building tools, slab roller, banding wheels, clay mixer, bisque kilns, and the raku kiln.

Methods of Instruction

Methods of Instruction

Types	Examples of learning activities
Lecture	This studio art class will be taught with both formal and ongoing integrated lecture. Image and video-enhanced lectures covering core concepts, terminology, and the historic development of ceramics followed by all-class or small-group discussions on the same topics.
Lab	Instructor-guided lab time to apply concepts and skills to course content through guided exercises. Lab time will include both one-on-one and group instruction.
Observation and Demonstration	Students will receive hands-on group demonstrations as well as one-on-one instruction, demonstration and direction. Lectures and demonstrations will often if not always be accompanied by visual aids and/or real hands-on experience. Further, students will learn by interacting with the materials and process inherent in studio art. Course content may be delivered through demonstration; clay forming and finishing demonstrations covering techniques, concepts, and material applications.
Critique	Oral or written group critiques analyzing finished examples of student work related to specific course assignments. Peer critiques reinforcing students' capacity to think critically about course assignments.
Field Trips	Students in this course may view artwork in the professional contexts of a gallery or museum. This activity will reinforce the students' understanding of historic and contemporary approaches to ceramics.
Other	Student presentations on historic and contemporary works from a diverse range of cultures.

Methods of Evaluation

Methods of Evaluation

Types	Examples of classroom assessments
Portfolios	Each student's "course portfolio" will be made up of assignments from the semester. The portfolio will be evaluated by the instructor and student at "final critique." Generally the creativity, craftsmanship, presentation and demonstrated improvement of the portfolio as a whole will be evaluated.
Projects	Student self evaluations, peer evaluations and instructor critique will be used to evaluate each project. Class participants may be given the opportunity to improve, and or redo each project before the end principles of the term and the final review of all projects as a whole within the "course portfolio."

Class Participation	Participation and performance in both oral and written critical analysis of work. Student participation in group, and all class critique will be evaluated. This evaluation will include correct use of visual language and terminology, and the student's ability to give and receive constructive criticism will also be evaluated.
Exams/Tests	Tests and exams may be used to ensure each student is able to identify, understand and practically apply specific processes and techniques to ceramic materials.

Assignments

Reading Assignments

Selected readings from student proposals, textbook, class handouts, periodicals or library collections.

For example:

1. Students will research an ancient style / type / or single piece of ceramics. The readings on their chosen subject should help inform them as to how, when and why the culture they are studying produced ceramic objects.
2. Students will read instructor-provided handouts (from "The Critique Handbook" or similar) on critique formats, concepts and terminology relative to this course level.

Writing Assignments

Written critical self-analysis.

For example:

1. Write a three-paragraph essay analyzing the strengths and weaknesses of three to five of your pieces.

Writing about humanity and ceramics.

For example:

1. After researching an ancient style / type / or single piece of hand-built ceramics write a paper that explains how, when and why the culture they are studying produced these ceramic objects.

Other Assignments

A number of wheel throwing assignments that demonstrate an understanding of basic throwing techniques. These studio assignments / projects should include centering, bowl making, cylinder making and cup making techniques. Assignments should focus on the visual strength and quality of form. Further traditional pulled handles and secondary forming techniques should be taught as well.

For example:

1. Create 10 bowls that focus on a continuous curve and have trimmed bottoms.
2. Create five well thrown cylinders.
3. Create 10 pulled handles for practice. Discuss them with your instructor and then wad them up to reuse the clay.
4. Create 5 wheel thrown cups with traditional pulled handles.
5. Create a piece inspired by the form, surface, and, or function of an ancient piece of ceramics that you learned about.

SECTION F - Textbooks and Instructional Materials
